The Story:

I was on a business trip to London, and i wanted to try London escort also to compare with escorts i was seeing in Amsterdam. And i chose Ariana caused she looked like a perfect blond Russian barbie. In real life she is truly stunning, young and her personality is great as well, very easy to talk to and stuff. After massage and kissing there was great and passionate OWO which made me think that she really love doing that. In the bedroom she got a bit dominant like i asked her and it wasn't even forced so she is great in role playing. I think it was a great value for this money cause she could be easily charging much more as she is high class escort, we chatted and joke a bit it was overall amazing experience! I really recommend her.
