### The Story:

picked up Sedusa (Sarah) from the tube and as we'd exchanged a few texts, emails and chats we were like old friends when we finally met.

Sarah is intelligent with a dry sense of humour and we really clicked immediately. Did some voyeur roleplay in the room with me spying on her undressing, her catching me and me "blackmailing" her into stripping and letting me "have" her. Phew! She really gets into it once she knows what you want! After a cuppa, we went for it again, then went for a drink and dinner. Sarah is even great company when dressed, and we talked and laughed throughout the meal, ommiting coffee and dessert as the sap was rising again...

Back to the room, and My God! The raunch was turned up to the max! A few more roleplays in her Sexy business suit had me trying to dry her sopping pussy with my tongue - I nearly drowned. We shagged until 4am (blue diamond enhanced) I think I came 7 times over the course of the date, the finale being a slow "wake up" fuck during which Sarah came so much my bollocks were soaked and the sheets resembled a lake! After parting company, I hobbled back to my room feeling like I'd run a marathon.

This truly was my most satisfying ever overnight,triggering my first ever field report. To be with an insatiable Milf who can enchant and amuse and fuck you to submission was like a dream date to me.

I don't think she'll suffer fools - so fools, leave her to the rest of us. And if you're bored with plastic looking pretty young airheads, I heartily recommend taking a look at her site.
