The Premises:

Clean, home-like small flat. Not on a main road and good parking.

The Lady:

Platinum blonde, mid 30s, tall with massive tits and long legs. Dressed in naughty nurse outfit when I arrived.

The Story:

She started by letting me suck on her huge tits, and bury my face between them. Then she wrapped them round my cock and slowly teased me. Then she went down on me, her uniform totally failing to hide her voluptuous figure and gorgeous big arse.

Then she asked if the patient needed a good seeing too, which I readily agreed i did. Next thing she was bouncing on my stiff dick, those massive tits rubbing in my face as I pounded her hard, before finally taking her doggie and then coming over her juicy ass.

Had a fantastic time, we chatted afterwards, and was told to call back again when she may have a friend working with her!

No worries there, I will be back very soon.
