The Lady:

Vixen photos heavily photoshopped to remove a badly done boob job.

The Story:

I saw Ana in the summer & she was perfect! Tall, stunning grey/green eyes & the sexiest model-like body. We had sex 3 times in an hour. One of the most naturally pretty girls I have met.

It was an unpleasant shock to see her again recently.

She has been abroad & bought herself some new boobs to replace her natural bee stings- Double D now she proudly showed me although she is worried one is bigger than the other. She has rushed back to work and her pix on the Vixens site are now heavily photoshopped to remove the scarring & bruising which is still clear when she strips. I was not allowed to touch them let alone suck. Pussy is still OK but sex with her now is like fucking a corpse - not allowed to touch her above the waist! SO disappointing...she could have become one of the greats! She has also had her pretty lips botoxed which was also entirely unnecessary.

Unless you are a fan of badly done boob jobs and botox Ana is sadly now to be avoided
