The Story:

An update on my report of about 2 years ago.

Horniness rating - the equivalent of 9 on the Richter scale; normal maximum (generally agreed to apply to sex-starved nympho) is 8.

Shaggability, encompassing such things as enthusiasm, experience, competence, ability to take and give a really good shagging - on the basis that usual requirements are: normal (?) males generally 5, olympic athletes such as 400 metre runners and that ilk usually 8 max, members of the SAS and paratroop regiment max 9 - Jenny at least 15.

THE acknowledged expert on making out with and discussing the relative merits of, waiters (although now a bit passe I understand), hotel administrators, hair consultants, etc in foreign climes such as Egypt, Turkey Greece et al and cabin staff and airline crew on way to and from such places.

NOT recommended for any with breathing difficulties, or prone to shortness of breath when excited or anyone likely to be required to perform for regular partner within 72 hours (for SAS or parachute regiment, others pro-rata).
