### The Story:

I was looking for a lady who does sensual massage and read this review of Cici. Arranged the meeting the previous day. She turned up punctually and was just as lovely as the review said. Got the paperwork out of the way, then lay down and was treated to a proper massage. Cici really knows what she's doing. The first part was very therapeutic. She has such soft, smooth hands. Then came the sensual part, which got me very aroused. What I really like about her is that she's skilled at both types of massage: the one that relaxes you if your muscles are aching, and the one that gets you aroused. Hope to see you again very soon, Cici xx
