### The Premises:

### The Lady:

she was tall, especially in those heels! I dont often go for outcall but since moving to London 6 months ago i now occasionally do but when i do I like to try and get girls that dont look like hookers and i thought from her pictures she did that. In real life she was a good choice as she was pretty without being tarty like some girls look. Nothing against them but it works for this situation.

### The Story:

To be fair to her Andora was very good, she did everything asked of her, gave a great massage, even though she hated my oil, and she kissed well, gave a great blow job and when it came to fucking she had one of the best arses i have seen in a long long time and it was a please to place my hands on it and eye it up whilst fucking her from behind. When she rode me her sex face was worth the money by itself.

A very good escort at a very good price. :)
