The Premises:

The Lady:

Isabella looks at around her 20's something she does match her photos although it does contain a bit of photoshop I think she is of Russian or eastern European ethnicity

The Story:

the time I spent with Isabella it was good she is a beautiful girl and does have very nice body aspects she is very sexy and was dressed very nicely the only thing I think could have been better it was her English and maybe she could have been more spontaneous she felt a bit far away but despite those two issues it was a great time.
