### The Premises:

My Place

### The Lady:

As on site. Good figure - great legs.

### The Story:

Feel a bit like Clarkson drumming his fingers on that Vectra; here's a good looking, very well presented, all the social skills lady making a liason with an escort about as exciting as a market research interview. OK you are not going to spark each other every time, but, at what is top wack for the region, there should be some attempt to find the client's trigger spots.

I suppose it could be that the lady is more at ease on a dinner date type meeting, so if you're on your own in a hotel with money to burn, don't let me put you off. But an hour's energetic raunch - nope.
